

"\$ALWIN Airdrop" WhitePaper

The Project where "Everyone can be a Winner"

Hello CryptoBro et CryptoSista !

We are excited to introduce you to "\$ALWIN AirDrop," a unique MEME project centered around \$ALWIN and the AirDrop on the TON chain.

If you're looking for a MEME Coin with the potential to turn your dreams into reality, you're in the right place !

Join our community and embark on this thrilling adventure. Together, we will push the limits and have fun while aiming for the Top !

Get ready, because a **Kamehameha** of incredible power is about to be unleashed ! Activate your **Sharingan** and **join us now !**

\$ALWIN Objectives

- Develop a MEME Coin capable of distributing AirDrops to infinity* and beyond.
- Create a MEME Coin that not only retains its value but also increases it over time through an innovative concept.
- Distribute \$ALWIN infinitely* in a predefined and random manner to certain holders, giving everyone the opportunity to become rich.
- Build a dynamic community around the MEME Token \$ALWIN, the ticker of the "ALWIN Airdrop."
- Establish a marketing wallet dedicated to the promotion and development of the \$ALWIN token.
- Generate enthusiasm around the TON chain and become its favorite mascot because ALWIN is a fan.
- Create a wallet dedicated to donations for charitable causes, supported by the ALWIN community.

*To reach 100 \$ALWIN starting from the maximum total supply in the \$ALWIN creator wallet, here are the estimates:

- For a market capitalization between \$1M and \$9M, it would take 168 years.
 - For a market capitalization between \$10M and \$100M, it would take 58 years.
 - For a market capitalization between \$100M and \$1000M, it would take 33 years.
- These estimates do not take into account BuyBacks and Unique AirDrops.

The Solutions Offered by \$ALWIN

- **Requirement to hold the token:** Holders must keep the token to benefit from the AirDrop, which helps preserve its value.
- **Competition among top investors:** A systematic AirDrop rewards the largest investors, encouraging healthy competition.
- **A thriving and growing community:** \$ALWIN unites an active and expanding community.
- **Guaranteed rewards for early and large investors:** Early adopters and major holders are assured of a reward.
- **Opportunity for all holders:** Even the smallest holders can benefit from a high-value AirDrop.
- **Annual donation to charity:** A dedicated wallet allows for annual donations to charitable causes.
- **Virtuous ecosystem:** Even newcomers can benefit from the AirDrop without fearing that the token will lose its value entirely like most MEME Tokens. In fact, the more holders \$ALWIN has, the higher the AirDrop's value increases, even as the amount of \$ALWIN in the creator wallet decreases.
- **Opportunity for new investors:** Each AirDrop may potentially cause a temporary dip, providing a buying opportunity for new investors.

Everything is ready for the AirDrop launch! No further development is needed. We just need to spread the word about \$ALWIN and reach our goals, dear \$ALWIN community!

\$ALWIN Milestone AirDrop

- **First Milestone - \$1M Market Cap:**
Unlocks a 0.75% monthly AirDrop.
Unlocks 4 beneficiary wallets: 1 "Whale" wallet (Top 1), 2 aleatory wallets, 1 "Robinhood" wallet.
- **Second Milestone - \$10M Market Cap:**
Unlocks a 0.5% weekly AirDrop.
Unlocks 6 beneficiary wallets: 3 "Whale" wallets (Top 3), 2 aleatory wallets, 1 "Robinhood" wallet.
- **Third Milestone - \$100M Market Cap:**
Unlocks a 0.25% every 2 days AirDrop.
Unlocks 12 beneficiary wallets: 5 "Whale" wallets (Top 5), 6 aleatory wallets, 1 "Robinhood" wallet.
- **Fourth Milestone - \$500M Market Cap:**
Unlocks a one-time 5% AirDrop.
Unlocks 18 beneficiary wallets: 7 "Whale" wallets (Top 7), 10 aleatory wallets, 1 "Robinhood" wallet.
- **The One Piece - \$1000M Market Cap:**
Unlocks a one-time 10% AirDrop.
Unlocks 24 beneficiary wallets: 9 "Whale" wallets (Top 9), 14 aleatory wallets, 1 "Robinhood" wallet.

Clarifications on the \$ALWIN AirDrop Wallets

- **Whale Wallets:** These are the wallets of the largest \$ALWIN holders, known as the Top Whale Holders.
- **Aleatory Wallets:** These wallets are divided into two categories, each receiving 50% of the allocated random AirDrops:
 - Wallets with a value greater than \$10,000.
 - Wallets with a value between \$1,000 and \$9,999.
- **Robinhood Wallets:** These are wallets with a value between \$1 and \$999.
- **Monthly AirDrop:** It will begin on the 1st of the month following the achievement of the first milestone and will be distributed on the 1st of each subsequent month.
- **Weekly AirDrop:** It will begin on the first Monday following the achievement of the second milestone and will be distributed every Monday.

\$ALWIN Milestone Rules

- **Non-cumulative milestones:** Each new milestone unlocked replaces the previous one. The benefits of previous milestones do not accumulate.
- **"Every 2 days" AirDrop:** This AirDrop will be executed on every even day.
- **Fourth Milestone and "The One Piece":** These milestones unlock a one-time 5% or 10% AirDrop and modify the number of beneficiary wallets but do not change the 0.25% AirDrop or the "every 2 days" frequency.
- **Adjustment of AirDrops after a new milestone:** After a new milestone is reached, the AirDrop will be adjusted accordingly and will no longer be downgraded. The only parameter that can be downgraded based on market capitalization is frequency. For example, if the market capitalization falls below \$1M, the AirDrop will be deactivated. If the capitalization exceeds \$10M again and then drops below this threshold, the frequency will decrease from weekly to monthly.
- **For "The One Piece":** A major event is planned. Perhaps [Pavel Durov](#) will agree to directly manage the aleatory wallets. Who knows? We can dream! An AirDrop of 1,000,000 \$ALWIN is planned for [Pavel Durov](#) to show our affection for him and his ecosystem.

\$ALWIN AirDrop Distribution

The AirDrop percentages (0.25%, 0.5%, 0.75%) as well as the one-time 5% and 10% AirDrops will be distributed as follows:

- **17.5%** for Marketing, Development, and BuyBack. These funds will always be converted into [TON](#) or [USDT](#).
- **7.5%** for donations (always converted into [TON](#) or [USDT](#)). Donations will be made once a year.
- **5%** for the [\\$ALWIN](#) wallet.
- **70%** to be shared among the Top [Whale](#) Wallets, [Aleatory](#) Wallets, and [Robinhood](#) Wallets.

Management of the Marketing/Development Wallet: Every three months, 50% of the remaining funds in the Marketing/Development wallet will be used to perform BuyBacks of [\\$ALWIN](#), targeting a market dip.

\$ALWIN AirDrop Rules

- **AirDrop Responsibility:** All AirDrops will be executed by **ALWIN**.
- **Rounding Amounts:** All AirDrops will be executed without decimal numbers, rounded down to the nearest whole number, even if the value is (.99).
- **Exclusion from Rankings:** The **\$ALWIN** Creator Wallet, **\$ALWIN** Wallet, and De.Dust.io Wallets will not be considered for the rankings of Top **Whale** Holders, Aleatory, and **Robinhood** AirDrops.
- **Selection of Aleatory and Robinhood AirDrops:** These AirDrops will be determined using Google's random number generator, selecting the holders wallets based on their positions.
- **Participation Threshold:** Wallets with less than \$1 will not be eligible for any AirDrop.
- **AirDrop Timing:** All AirDrops will be conducted at different times of the day to avoid price fluctuations and manipulations.
- **AirDrop Execution Order:** AirDrops will start with the Donation Wallet, followed by the Marketing Wallet, then the **Robinhood** Wallets, Aleatory Wallets, Top **Whale** Wallets, and finally the **\$ALWIN** Wallet. They may be conducted at different times of the day.
- **Order of Aleatory AirDrops:** All Aleatory AirDrops will be executed in the order generated by the random number generator.
- **Publication of Results:** All randomly generated numbers and the wallets selected for the AirDrop will be published once all transactions are complete.
- **Possibility of Duplication:** A wallet that has already received an AirDrop can receive a second one consecutively within the same AirDrop. **\$ALWIN** does not choose; **God** does !
- **Rights of Top Whale Holders:** Wallets predefined by their position, such as the Top **Whale** Holders, have the right to participate in the Aleatory AirDrop category 1. They are rich and have the right to become even richer. Don't be jealous; be inspired by them. **\$ALWIN** does not choose them; **God** does !
- **Handling Ties:** If two or more wallets (Top **Whale**, Aleatory, or **Robinhood**) have the same ranking (token quantity), their ranking will be determined by their order at the time of data extraction.
- **\$ALWIN Price Reference:** The **\$ALWIN** price will be taken from GeckoTerminal at the time of data extraction.

\$ALWIN Marketing/Development Wallet

- **Development:** Funding for website development, moderation, and other technical needs.
- **External Marketing:** Investment in external promotional campaigns, such as Telegram calls, placements on tracking platforms (Screener), and listing fees on exchanges.
- **Internal Marketing:** Organization of MEME contests, polls, and games within the community to enhance engagement and visibility of \$ALWIN.

\$ALWIN Creator Wallet

- **Quantity in the creator wallet:** Don't be alarmed by the amount of \$ALWIN in the creator wallet. This allocation is necessary for the project's needs and aims to facilitate large AirDrops over time.
- **Total tokens in the creator wallet:** 450,000,000 \$ALWIN at the project's inception.
- **Allocation for Marketing and Listing:** 11.88% (i.e., 50,000,000 \$ALWIN) of the total supply in the \$ALWIN creator wallet is directly dedicated to marketing and listing. These tokens will be sold in small quantities as needed.
- **Allocation for AirDrops:** 88.12% (i.e., 400,000,000 \$ALWIN) of the total supply in the \$ALWIN creator wallet is dedicated to \$ALWIN AirDrops.
- **Security Measure and Fund Distribution:** For security reasons and to build confidence in the project, \$ALWIN has decided to distribute its treasury across several wallets, which are, of course, whitelisted. This does not alter the total supply of the treasury, which remains at 400,000,000 \$ALWIN.
